

Discrete Mathematics
Volume 180, Numbers 1-3, 1 February 1998

Contents

Preface

<i>B. Leclerc and J.-Y. Thibon</i>	1
------------------------------------	---

Contributions

<i>S.A. Abramov, P. Paule and M. Petkovšek</i> <i>q</i> -Hypergeometric solutions of <i>q</i> -difference equations	3
<i>T.V. Alekseyevskaya and I.M. Gelfand</i> Incidence matrices, geometrical bases, combinatorial prebases and matroids	23
<i>E. Barucci, A.D. Lungo, E. Pergola and R. Pinzani</i> A methodology for plane tree enumeration	45
<i>A. Bottreau, A.D. Bucchianico and D.E. Loeb</i> Computer algebra and Umbral Calculus	65
<i>M. Bousquet-Mélou</i> New enumerative results on two-dimensional directed animals	73
<i>C. Corsani, D. Merlini and R. Sprugnoli</i> Left-inversion of combinatorial sums	107
<i>P. de la Torre and D.T. Kao</i> An algebraic approach to the prefix model analysis of binary trie structures and set intersection algorithms	123
<i>S. Dulucq and O. Guibert</i> Baxter permutations	143
<i>P. Feinsilver and R. Schott</i> Formal power series, operator calculus, and duality on Lie algebras	157
<i>S. Feretić</i> A new way of counting the column-convex polyominoes by perimeter	173
<i>X. Gourdon</i> Largest component in random combinatorial structures	185
<i>C. Hespel and G. Jacob</i> First steps towards exact algebraic identification	211
<i>Hoang Ngoc Minh</i> Fonctions de Dirichlet d'ordre <i>n</i> et de paramètre <i>t</i>	221
<i>P.-V. Koseleff</i> Relations among Lie-series transformations and isomorphisms between free Lie algebras	243

<i>P.-V. Koseleff</i> Relations among Lie-series transformations and isomorphisms between free Lie algebras	243

<i>C. Lenart and N. Ray</i> Hopf algebras of set systems	255
<i>A.I. Molev</i> Stirling partitions of the symmetric group and Laplace operators for the orthogonal Lie algebra	281
<i>M. Noy</i> Enumeration of noncrossing trees on a circle	301
<i>S. Poirier</i> Cycle type and descent set in wreath products	315
<i>B. Shapiro, M. Shapiro and A. Vainshtein</i> Kazhdan–Lusztig polynomials for certain varieties of incomplete flags	345
<i>E. Steingrímsson</i> A chromatic partition polynomial	357
<i>R.A. Sulanke</i> Catalan path statistics having the Narayana distribution	369
<i>M. Yang</i> An algorithm for computing plethysm coefficients	391
<i>A. Zvonkin</i> How to draw a group?	403
Author index to volume 180	415
